Shut down the ladder until Monday (maybe for the year). Took 250K eggs today, grand total is 1.7 million, should be enough for everyone. Interesting, done the same day as last year (Friday of the 3rd week). Probably could take a lot more if needed. Too bad we can't freeze some till next year, have a feeling we'll need them then unless we get a lot of snow in the mts this year.

Jeff Hendrickson
